

USER STORIES

1. Logout (2 Story points)

As a logged-in user, I want to log out of the platform so that my account remains secure when I am done using it.

UAT 1: Given I am a logged-in student on my dashboard, When I click the logout button, Then I am redirected to the login page and my session is cleared.

UAT 2: Given I am a logged-in vendor on my dashboard, When I click the logout button, Then I am redirected to the login page and my session is cleared.

UAT 3: Given I am a logged-in admin on the admin dashboard, When I click the logout button, Then I am redirected to the login page and my session is cleared.

UAT 4: Given I have successfully logged out, When I try to navigate back to my dashboard using the browser back button or by typing the URL, Then I am redirected to the login page and cannot access any protected pages.

UAT 5: Given I have successfully logged out, When I refresh the page or open a new tab, Then I am not automatically logged back in and must sign in again to access the platform.

2. Student Creates Order (8 Story points)

As a student, I want to place an order from a vendor's menu so that I can request food for pickup.

UAT 1: Given I am a logged-in student on a vendor's menu page, When I click "Add to Order" on a menu item, Then the item is added to my order with the correct name, price and quantity.

UAT 2: Given I am a logged-in student with at least one item in my order, When I click "Place Order", Then the order is saved to the database with status "pending" and I see a confirmation to say order has been placed successfully.

UAT 3: Given I am a logged-in student with items in my order, When I view my order summary, Then I can see each item's name, quantity, unit price and the correct total amount before placing the order.

3. Student Payment (13 Story points)

As a student, I want to pay for my order through a secure payment gateway so that my order is confirmed and sent to the vendor.

UAT 1: Given I am a logged-in student with an order in "pending" status, When I am redirected to the payment gateway and complete payment successfully, Then my order status is updated to "paid" and I am shown a confirmation screen displaying my order summary and total amount paid.

UAT 2: Given I am a logged-in student on the payment page, When my payment is declined by the gateway, Then my order status remains "pending", I am shown a clear error message explaining the failure, and I am given the option to retry.

UAT 3: Given I am a logged-in student on the payment page, When I close the payment popup or navigate away before completing, Then no payment is recorded and my order status remains "pending".

UAT 4: Given a student has successfully completed payment, When the gateway confirms the transaction, Then a payment record is created in the database linked to the correct order and vendor.

UAT 5: Given I am a logged-in student, When I attempt to access the payment page for an order that already has a "paid" status, Then I am blocked from paying again and shown a message indicating the order has already been paid for.

4. Student Tracks Order (3 Story points)

As a student, I want to track the status of my order so that I know when my food is ready for collection.

UAT 1: Given I am a logged-in student with at least one active order, When I navigate to my orders page, Then I can see all my orders listed with their current status, vendor name, items ordered, and total price.

UAT 2: Given I am a logged-in student viewing a paid order, When the vendor progresses the order through "received" → "preparing" → "ready", Then each status change is reflected on my tracking page in the correct sequence without any steps being skipped or displayed out of order.

UAT 3: Given I am a logged-in student, When my order status changes to "ready", Then I receive a notification informing me that my order is ready for collection.

UAT 5: Given I am a logged-in student, When I navigate to my orders page and have no orders placed, Then I am shown an empty state message indicating that I have not placed any orders yet.

5. Vendor Manages Order Status (5 Story points)

As a vendor, I want to view incoming orders and update their status so that students are kept informed and I can manage my kitchen workflow.

UAT 1: Given I am a logged-in vendor with active orders on my dashboard, When I navigate to the Orders section, Then all incoming orders are displayed with the student's name, items ordered, total amount, and current status visible.

UAT 2: Given I am a logged-in vendor and I have an order with status "paid", When I click "Mark as Received", then "Mark as Preparing", then "Mark as Ready", Then the order status updates correctly through "received" → "preparing" → "ready" in the correct sequence and the student is notified at each stage.

UAT 3: Given I am a logged-in vendor and I have an order with status "paid", When I attempt to set the order status directly to "ready" skipping "received" and "preparing", Then the system rejects the status change and displays an error message indicating that statuses must be updated in the correct order.

UAT 4: Given I am a logged-in vendor and an order has status "ready", When the student collects their order, and I click "Mark as Collected", Then the order status is updated to "collected" and the order is moved out of the active orders list.

6. Profile Details (3 Story points)

As a user, I want to press the avatar on the dashboard so that I can quickly view and access my account details.

UAT 1: Given I am a logged-in user, When I navigate to my dashboard, Then I can see my avatar displayed prominently at the top of the screen, and it is tappable/clickable.

UAT 2: Given I am a logged-in student or admin on the dashboard, When I press my avatar, Then I am able to see my name, email address, and any other relevant personal information.

UAT 3: Given I am a logged-in vendor viewing my profile details page, When I update my phone number and/or description and press save, Then the changes are successfully stored and the updated phone number and description are reflected on my profile immediately.

UAT 4: Given I am a logged-in user viewing the avatar, When the page loads, Then the details shown match the information stored in my account, with no outdated or incorrect data displayed.

TASKS

1. Implement logout functionality and session clearing for all user roles
2. Implement order creation flow — add to order, order summary, and place order
3. Integrate payment gateway for student order payments
4. Implement order tracking page with real-time status updates for students
5. Implement vendor order management dashboard with status progression controls
6. Create APIs for order, payment, and status management
7. Implement Profile Panel to view user details
