

Sprint 3

User stories:

User Story 1: Admin view vendor menu (2 Story points)

As an admin, I want to view any vendor's menu so that I can monitor menu content for policy compliance, assist with user complaints, and maintain operational oversight without modifying vendor-owned data.

UAT 1 : Admin can see all menu item details for a vendor

Given I am logged in as an admin, and a vendor has at least one menu item listed

When I open that vendor's menu from the admin dashboard

Then I can see each item's name, description, price, category, and availability status displayed correctly.

UAT 2 :Admin sees an empty state when a vendor has no menu items

Given I am logged in as an admin, and a registered vendor has not added any menu items yet

When I open that vendor's menu from the admin dashboard

Then an empty state message is displayed indicating that this vendor has no menu items

UAT 3 :Admin menu view is read-only with no modification controls

Given I am logged in as an admin, and I am viewing a vendor's menu

When the menu page fully loads

Then no add, edit, or delete buttons are rendered on the page and I cannot modify any menu item data.

UAT 4 :Admin can navigate between different vendors' menus

Given I am logged in as an admin and multiple vendors exist on the platform

When I select a different vendor from the vendor list

Then the menu displayed updates to show only that vendor's items, with no items from other vendors appearing

UAT 5 : Admin cannot access vendor menu view when not logged in

Given I am not logged in as an admin

When I attempt to access the admin vendor menu view directly via URL

Then I am redirected to the login page, and the vendor menu content is not accessible

User Story 2: Student Submits a Review (5 Story points)

As a student, I want to leave a rating and review for a vendor after collecting my order so that I can share my experience and help other students make informed decisions.

UAT 1: Student can submit a review after order is collected

Given: I am a logged-in student, and I have an order with status "collected" When: I navigate to my order history and click "Leave a Review" on that order Then: I am presented with a review form where I can submit a star rating (1-5) and an optional written comment

UAT 2: Student cannot review an order that has not been collected

Given: I am a logged-in student and I have an order with a status other than "collected" (e.g. "pending", "paid", "preparing") When: I view that order in my order history Then: the "Leave a Review" option is not available and I am shown a message indicating that reviews can only be submitted once an order has been collected

UAT 3: Student cannot submit a duplicate review

Given: I am a logged-in student, and I have already submitted a review for a specific order When: I attempt to submit another review for the same order Then: I am blocked from submitting and shown a message indicating that I have already reviewed this order

UAT 4: Submitted review is visible on the vendor's profile

Given: I am a logged-in student, and I have successfully submitted a rating and review for a vendor When: any student navigates to that vendor's profile or menu page Then: my review is displayed publicly with my name, star rating, written comment, and the date it was submitted

UAT 5: Student can see an empty reviews state on a new vendor

Given: I am a logged-in student browsing a vendor who has received no reviews yet When: I navigate to that vendor's profile or menu page and view the reviews section Then: an empty state message is displayed informing me that this vendor has not received any reviews yet

User Story 3: As an admin, I want to see the total orders, so that I can monitor and manage overall order activity on the platform. (5 Story points)

UAT 1: Total Orders Count Displays on Dashboard

Given I am logged in as an admin and at least one order exists in the system. When I navigate to the admin dashboard. Then I should see a total order count that matches the actual number of orders in the system.

UAT 2: Total Orders Updates After a New Order is Placed

Given I am logged in as an admin, and I can see the current total orders count on the dashboard When A new customer places an order Then the total orders count should increment by 1 to reflect the newly placed order.

UAT 3: Total orders count reflects all order statuses

Given I am logged in as an admin and orders exist with varying statuses (pending, received, paid, preparing, ready, collected, cancelled) When I view the total orders metric on the overview

page Then the total orders count should include all orders regardless of status, unless a filter is applied

UAT 4: Total sales reflect the correct filter period

Given I am logged in as an admin When I view the total sales metric and select a filter (all time, month, week, or day) Then the total sales value should update to reflect only the revenue from orders completed within that selected period And switching between filters should update the value immediately without a page refresh

UAT 5: Bar chart displays orders grouped by status

Given I am logged in as an admin and orders exist across multiple statuses When I view the orders by status bar chart on the overview page Then the chart should display a bar for each order status (pending, received, paid, preparing, ready, collected, cancelled) And each bar should accurately reflect the current count of orders in that status And the chart should update if order statuses change

UAT 6: Platform summary shows active student and vendor counts

Given I am logged in as an admin When I view the platform summary section Then I should see the total number of active students and the total number of active vendors currently registered on the platform and suspended or inactive accounts should not be included in the active counts

User Story 4: As an admin I want to be able to open a student or vendor profile and view their associated orders (3 Story points)

UAT 1: Student profile orders display.

Given I am logged in as an admin, and I open a student profile. When the student has one or more existing orders, then a list of that student's orders is visible.

UAT 2: Student Profile Empty Orders State

Given I am logged in as an admin and open a student's profile, when the student has no orders, then a clear empty message is displayed that the particular student has no orders.

UAT 3: Vendor Profile Orders Isolation Validation

Given I am logged in as an admin and open a specific vendor profile, there should only be orders belonging to that specific vendor, and no other vendor orders appear.

UAT 4: Vendor Profile Orders Listing Display

Given I am logged in as an admin and open a vendor's profile, on the orders section should be a list of that vendor orders visible.

UAT 5: Access Control for Orders Section

Given a user without admin permission opens a student or vendor profile, when they attempt to view the orders section, then the orders are not displayed, and an appropriate access denied message is shown.

User Story 5: As an admin, I want to suspend a vendor so that students are protected from unreliable or harmful vendors. (5 Story Points)

UAT 1 : Admin can suspend an active vendor with a reason

Given I am logged in as an admin and a vendor has the status Active, When I navigate to the Vendor Management page, select the vendor, choose a suspension reason, and click Suspend Vendor, Then the vendor's status changes to Suspended and a confirmation message is displayed to the admin.

UAT 2 :Suspended vendor cannot accept new orders

Given a vendor has been suspended by an admin, when a student browses the platform and attempts to place an order from that vendor, Then the student sees a message saying the vendor is currently unavailable and cannot complete the order.

UAT 3 :Admin can view the suspension reason and timestamp

Given a vendor was suspended with a recorded reason, When the admin opens that vendor's profile in the Admin Dashboard, Then the profile displays the status as Suspended along with the suspension reason and the date and time it was applied.

UAT 4 :Admin can reinstate a suspended vendor

Given a vendor is currently Suspended, When the admin is satisfied the issue is resolved and clicks Reinstate Vendor, Then the vendor's status returns to Active, students can place orders again, and the reinstatement is recorded.

UAT 5 : Admin must provide a reason before suspending a vendor

Given I am logged in as an admin and I select an active vendor to suspend, When I attempt to confirm the suspension without entering a reason, Then the system prevents the suspension from proceeding and prompts me to provide a reason before continuing.

User Story 6: Vendor View student reviews (2 Story points)

As a vendor, I want to view reviews left by students on my profile so that I can understand customer feedback and monitor how my service is being perceived on the platform.

UAT 1 : Vendor can see all review details on their profile

Given I am logged in as a vendor and at least one student has submitted a review for my profile

When I navigate to my reviews section

Then I can see each review displaying the student's name, star rating, written comment, and the date it was submitted

UAT 2 :Vendor sees an empty state when no reviews exist

Given I am logged in as a vendor, and no students have submitted any reviews for my profile yet

When I navigate to my reviews section

Then an empty state message is displayed indicating that no reviews have been received yet

UAT 3 :Vendor reviews section is read-only

Given I am logged in as a vendor , and I am viewing my reviews section

When the reviews page fully loads

Then no edit or delete controls are visible and I cannot modify any review content

UAT 4 :Vendor can only see reviews belonging to their own profile

Given I am logged in as a vendor and other vendors on the platform have also received reviews

When I navigate to my reviews section

Then only reviews submitted for my profile are displayed and no other vendor's reviews appear

UAT 5 :Reviews reflect the correct overall star rating

Given I am logged in as a vendor and multiple students have submitted reviews with different star ratings

When I navigate to my reviews section

Then an overall average star rating is displayed at the top of the section that correctly reflects all submitted ratings

TASKS

1. Building interface for student reviews.
2. Implementation of functionality for admin to view vendor menus.
3. Building feature to suspend vendors.
4. Order retrieval and display within student and vendor profile views.
5. Overview page- admin views total orders and manages overall order activity.
6. Creating a feature that allows students to submit reviews for vendors.
